

Please Help Save My Life!

I am a single, dedicated dad and a solid member of this community. Unfortunately, both my kidneys have failed. I spend every night, all night, connected to a dialysis machine & ½ an hour every afternoon doing it manually, while waiting for a donor kidney. There is no guarantee the dialysis will continue to work forever.

I URGENTLY NEED A NEW KIDNEY! I want nothing more than to go back to living a normal life and raising my son — watching him graduate from high school, then college — and perhaps seeing grandchildren one day.

YOU CAN HELP!

YOU OR SOMEONE YOU KNOW MAY BE A LIVE DONOR FOR ME — AND BE ABLE TO SAVE MY LIFE.

Some facts about live kidney donation:

- Everyone is born with two kidneys. You only need one to live
- A common procedure that won't impair the donor's health or lifestyle
- Blood type does not matter.
- Recovery for donor is very quick
- No cost to the donor; all costs are paid by my insurance

PLEASE CONSIDER BEING TESTED TO BE A DONOR. Take the first step today — it's easy, completely confidential, and there's no obligation. I won't even know you've looked into it unless you tell me yourself. Go to www.AKidneyForRichard.com and follow the instructions under **I NEED A KIDNEY**, (just under the Header & menu).

Please forward this to everyone you know. Imagine the blessing of saving a life! I am happy to answer your questions. Reach me at (707) 595-0866 or Kidney@AKidneyForRichard.com.

Wishing you all the best, *Richard Lazovick*
